Testing: Jest, Cypress
APIs: REST, GraphQL, WebSocket
Tools: Git, GitHub, Postman, VS Code, Jira, Trello
Soft Skills: Communication, Problem Solving, Fast Learning, Team Collaboration

---

Profile

Full-stack developer with 1+ year of hands-on experience building and deploying modern web applications using React, Node.js, and Next.js.

Currently contributing as a Full-Stack Developer to the Ethiopian Orthodox Open-Source Project, creating software that supports community and educational systems.

Selected for the Delta Developer Program, collaborating with international mentors and developers to build real-world products and improve teamwork, architecture, and cloud deployment skills.

Certified in Google Cloud Engineering, with growing expertise in DevOps and cloud infrastructure. Passionate about open-source collaboration, scalable systems, and impactful products.

Experience

Full-Stack Developer — Ethiopian Orthodox Open-Source Project
Aug *2025 – Present*

- Building community-focused open-source software using Next.js, Node.js, and MongoDB.

- Integrated authentication and real-time data features across multiple modules.

- Collaborate with global contributors through GitHub and Agile sprints.

- Manage deployment pipelines using Docker and GitHub Actions.

Full-Stack Developer — Delta Developer Program
Oct *2025 – Present*

- Selected from a global pool of developers to build and ship real-world tech products.

- Designed and deployed scalable full-stack applications using AWS and Google Cloud.

- Improved backend performance through API optimization and clean architecture.

- Collaborate with mentors and teammates in fast sprints to deliver production-ready code.

-

Projects

[SnapCast](#) — Screen Recording and Sharing Platform (Jun 2025)
Developed a user-friendly platform for recording and sharing screens in real-time. Implemented React frontend with Firebase backend for authentication and storage.

[Movieverse](#) (May 2025)
Built a movie discovery web app using Next.js and Tailwind CSS. Integrated third-party APIs for dynamic movie data fetching.

[Converso](#) — Real-time AI Teaching Platform (Jun 2025)
Created an AI-powered chat interface for live teaching support. Integrated real-time messaging and AI API using Firebase and React.

Certifications

Web Development Certificate — Dec 2024 ([View Certificate](#))

Google DevNet Associate ([View Certificate](#))

Google Cloud Engineering ([View Certificate](#))

Education

Self-taught developer through online courses, tutorials, and real-world projects. Actively expanding skills with formal cloud engineering training from Google.

Community & Leadership

Rotaract Club Member: Contributed to community service and professional development initiatives.

Additional Information

Active participant in national and international hackathons, including Cursor Hackathon Addis Ababa 2025 and Ethiopian Cyber Talent Challenge by INSA.

Strong interest in digital public infrastructure, APIs, and ethical AI governance as part of Africa's tech future.
